

## Introducing Historic Storefront Series BH01

Create the classic, decorative appearance of historic, wood-framed storefronts and enjoy all of the benefits of modern aluminum technology. As with all Boyd historically accurate replicas, this system is designed to meet strict historic replication standards, and it's available with historic grids and muntin systems that are prefabricated at Boyd for fast and easy field installation.

*The BH01 Storefront Series is uniquely designed to conform to historical specifications and configurations.*

# Boyd® Historic Storefront
